

Avenue-OS: Role-Wise System User Guide

Welcome to the client-facing **Avenue-OS Role-Wise System User Guide**. This guide provides an overview of all user roles implemented in the system, detailing their permissions, accessible screens, key workflows, and detailed user journeys.

1. Summary of Roles & Core Responsibilities

The system enforces Role-Based Access Control (RBAC) by mapping system roles to a set of granular permission flags. These flags determine which screens are visible in the sidebar navigation and what actions can be executed.

Role	Core Responsibility	Dashboard Layout	Primary Action Permissions
ADMIN	Full system administration and permission overrides.	Management Command Center	All Actions (Project, Task, RFI, Users, settings overrides)
DIRECTOR	Strategic business oversight and operational monitoring.	Management Command Center	All Actions (Project, Task, RFI, Users)
ASSOCIATE_DIRECTOR	High-level management and project definition.	Management Command Center	Create/Edit Projects, Create/Assign Tasks, Resolve RFIs
PROJECT_MANAGER	Operational sprint tracking, task coordination, and timesheet reviews.	Management Command Center	Project CRUD, Task CRUD, Resolve RFIs, Sprint/Target management
LEAD_ENGINEER	Technical team coordination, task allocation, and RFI resolution.	Member Dashboard	Create/Assign Tasks, Resolve RFIs
DESIGN_ENGINEER	Design planning, task creation, and technical execution.	Member Dashboard	Create Tasks, Resolve RFIs
ENGINEER	Task execution, daily progress updates, and timesheet logging.	Member Dashboard	Task updates, timesheet logs (no management actions)

Role	Core Responsibility	Dashboard Layout	Primary Action Permissions
JR_DRAFTSMAN	Drafting task execution, standups, and hours logging.	Member Dashboard	Task updates, timesheet logs (no management actions)
INTERN	Engineering support and daily task updates.	Member Dashboard	Task updates, timesheet logs (no management actions)

2. Dashboard Layout Configurations

Depending on permissions, users automatically view one of two layouts on the dashboard (**Command Center**):

A. Management Command Center (ADMIN, DIRECTOR, ASSOCIATE_DIRECTOR, PROJECT_MANAGER)

- **KPI Tiles:** Quick counts of Active Projects, Active Tasks, Active Blockers, and Weekly Man-Hours.
- **Target/Sprint Selector:** Dropdown to inspect metrics of a specific active or past Sprint Target.
- **Sprint Health Panel:** A visual burndown chart, progress percentage bar, and remaining days.
- **Team Workload Panel:** Breakdown of active task count and story points per team member to prevent overallocation.
- **Sprint Board Snapshot:** Frequencies of tasks in Backlog, Todo, In Progress, In Review, and Done states.
- **Team Standup Monitoring:** Real-time status list of team members showing who has submitted today's standup or reported a blocker.
- **Organization Activity Feed:** A live feed of all recent events (task completion, comments, file uploads).

B. Member Dashboard (LEAD_ENGINEER, DESIGN_ENGINEER, ENGINEER, JR_DRAFTSMAN, INTERN)

- **Overview Cards:** Shows personal counts of Tasks Pending, Assigned for Review, Submitted Daily Reports, and Weekly Hours Logged.
- **My Work Today:** Shows the current user's target focus and tasks scheduled for today.
- **Mini Sprint Board:** Compact Kanban layout showing the user's own assigned tasks.
- **Member Activity Feed:** A personalized feed of updates directly relating to the user's tasks.

3. Detailed Role Workflows & Journeys

ADMIN

The **Admin** is the ultimate controller of Avenue-OS. They manage organizational structure, user roles, security, and override configurations.

- **Can Access:** All sidebar modules including Projects, Targets, Target Reports, All Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Logs, Analytics, Reports, Audit Logs, Feedbacks, Team Management, Calendar, and Settings.
- **Can Perform:** All project and task operations (create, edit, delete, assign), resolve RFIs, manage users, modify database role permissions (excluding ADMIN permissions), terminate user sessions, and hard delete custom roles.

- **Cannot Access:** No restrictions.

● Step-by-Step Workflow:

1. Log in to Avenue-OS.
2. Review overall sprint KPIs, standups, and blockers in the Command Center.
3. Access **Settings** -> **Roles & Permissions** to customize permissions or create new roles.
4. Navigate to **Team Management** to invite new users or assign them to projects/sprints.
5. Verify security metrics and manage active user sessions in the security panel.
6. Review full organization **Audit Logs** for security compliance.

User Journey: Admin -> Login -> Command Center -> Manage Users & Roles -> Configure Security Settings -> Audit Logs -> System Overrides

DIRECTOR

The **Director** monitors staff efficiency, operational output, and high-level project progress to guide company strategy.

- **Can Access:** All sidebar modules (Projects, Targets, Reports, Analytics, Audit Logs, Team Management, Settings, etc.).
- **Can Perform:** Project creation/management, user creation/management, task creation/assignment/deletion, and RFI resolution.
- **Cannot Access:** Cannot edit the ADMIN role's permissions or manage sessions of administrators.
- **Step-by-Step Workflow:**
 1. Log in and check high-level operational statistics on the Command Center.
 2. Go to **Analytics** to view company-wide productivity trends, velocity, and average completion times.
 3. Go to **Reports** to download Sprint, Team, or Project reports.
 4. Review **Team Management** and staff workload allocations.
 5. Navigate to **Audit Logs** to view historical operational logs.

User Journey: Director -> Login -> Command Center -> Review Reports & Analytics -> Monitor Staff Workload -> Assess Sprint Health -> Coordinate with PMs

ASSOCIATE_DIRECTOR

The **Associate Director** focuses on task scheduling, project definition, and aligning team coordination.

- **Can Access:** Projects, Targets, Target Reports, All Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Logs, Analytics, Reports, Feedbacks, Team Directory, Calendar, and Settings.
- **Can Perform:** Create/edit projects, define targets/sprints, create/assign tasks, and resolve RFIs.
- **Cannot Access / Perform:**
 - Cannot delete projects (DELETE_PROJECT).
 - Cannot delete tasks (DELETE_TASK).
 - Cannot manage users or edit roles (MANAGE_USERS).
 - Cannot view the organization's backend Audit Logs (VIEW_AUDIT_LOG).
- **Step-by-Step Workflow:**
 1. Log in and check the Command Center dashboard.
 2. Go to **Projects** to set up a new project or update details of active ones.
 3. Navigate to **Targets** to create milestones (Sprints) for projects.
 4. Navigate to **Tasks** or **Boards** to schedule work, assign tasks to leads, and set deadlines.
 5. Collaborate in the **Chat** tool (creating project channels or answering direct queries).
 6. Review team progress reports and analytics.

User Journey: Associate Director -> Login -> Command Center -> Manage Projects & Targets -> Define Tasks & Assignments -> Review Team Progress Reports -> Chat Collaboration

PROJECT_MANAGER

The **Project Manager (PM)** is the primary operational administrator. They drive sprint delivery, manage task cards, resolve blockers, and review timesheets.

- **Can Access:** Projects, Targets, Target Reports, All Tasks, My Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Logs, Analytics, Reports, Feedbacks, Team Management, and Calendar.
- **Can Perform:** Create, edit, and delete projects; manage target sprints; create, assign, and delete tasks; resolve blocker RFIs.
- **Cannot Access / Perform:**
 - Cannot manage users, add/remove members, or modify roles (MANAGE_USERS is disabled).
 - Cannot access the **Settings** panel (VIEW_SETTINGS is disabled).
 - Cannot view the system **Audit Logs** (VIEW_AUDIT_LOG is disabled).

● Step-by-Step Workflow:

1. Log in to check the Command Center KPIs, standups, and blockers.

2. Review **Team Standup Monitoring** to see who submitted updates.

3. Open the **Tasks** or **Boards** screen to track sprint board cards and shift cards from *In Review* to *Done*.

4. Identify blockers/RFIs on task cards, assign helpers, and resolve resolved RFIs with notes.

5. Go to **Timesheets** to review all logged hours for the team (PMs see *all* logs).

6. Create announcement channels in **Chat** to coordinate project delivery.

LEAD_ENGINEER

The **Lead Engineer** bridges management and execution. They coordinate engineering assignments, create technical tasks, and resolve technical RFIs.

- **Can Access:** Projects directory, My Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Log, Feedbacks, Team Management, Calendar, and Settings.
- **Can Perform:** Create tasks, assign tasks to others, and resolve RFIs.
- **Cannot Access / Perform:**
 - Cannot create, edit, or delete projects/targets.
 - Cannot delete tasks (DELETE_TASK).
 - Cannot manage user accounts/permissions.
 - Cannot view high-level analytics, target reports, org-wide reports, or audit logs.
 - Cannot view other members' timesheets (only see their own and the Project Manager's timesheets).
- **Step-by-Step Workflow:**
 1. Log in and view personal overview and today's schedule on the Member Dashboard.
 2. Navigate to **Kanban Boards** to check task distribution.
 3. Create engineering sub-tasks and assign them to engineers, draftsmen, or interns.
 4. Navigate to **Progress Reports** to submit their daily standup update.
 5. Review RFIs raised by team members and resolve them by posting technical notes.
 6. Log hours in **Timesheets** for the tasks they worked on.

DESIGN_ENGINEER

The **Design Engineer** plans and designs technical details, creates design tasks, and helps resolve design RFIs.

- **Can Access:** Target Reports, My Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Log, Feedbacks, Team Management, Calendar, and Settings.
- **Can Perform:** Task creation (CREATE_TASK), and RFI resolution (RESOLVE_RFI).
- **Cannot Access / Perform:**
 - Cannot manage, assign, or reassign tasks to others (ASSIGN_TASK is disabled). Can only assign tasks to themselves or leave them unassigned.
 - Cannot edit project details or targets.
 - Cannot delete tasks.
 - Cannot view the Projects Directory.
- **Step-by-Step Workflow:**
 1. Log in to view pending design tasks and today's focus.
 2. Navigate to **Kanban Boards** to pick up cards from the backlog.
 3. Create draft task cards for drawings or models that need to be made.
 4. Update card status to *In Progress* and then *Internal Review*.
 5. Submit a daily standup stating yesterday's achievements and today's design plans.
 6. Log daily design hours in the **Timesheets** portal.

ENGINEER / JR_DRAFTSMAN / INTERN

These roles focus on execution, moving task cards, submitting daily progress reports, raising RFIs when stuck, and logging timesheets.

- **Can Access:** My Tasks, Kanban Boards, Chat, Progress Reports, Timesheets, Activity Log, Team Directory, and Calendar (Jr. Draftsman and Intern also have access to Feedbacks and Settings).
- **Can Perform:** Update task details, add subtasks, upload attachments, write comments, raise RFIs/blockers, submit daily progress reports, and log timesheets.
- **Cannot Access / Perform:**
 - Cannot create new tasks or assign/reassign tasks.
 - Cannot delete tasks or resolve RFIs.
 - Cannot edit or delete other users' comments.
 - Cannot access Projects, Targets, Target Reports, Analytics, Reports, or Audit Logs.

- Cannot create channels in chat or post in Announcement channels (restricted to authorized roles and email addresses).
- **Step-by-Step Workflow:**
 1. Log in to view assigned tasks on the Member Dashboard.
 2. Navigate to **My Tasks** or **Kanban Boards** to view detailed instructions, checklists, and attachments.
 3. Update the task card status (e.g., drag from *Todo* to *In Progress*).
 4. If blocked (e.g., waiting for architectural details), open the task, click **Raise RFI**, select the blocker type, type a description, and select a helper.
 5. Submit the daily progress report detailing today's accomplishments.
 6. Log actual hours in **Timesheets** before logging out.

User Journey: Engineer -> Login -> Member Dashboard -> Open Kanban Board -> Update Task Status -> Raise Blocker RFI (if stuck) -> Submit Standup Update -> Log Timesheet
